

How to prepare the educational documents for submission?

The minimum (compulsory) package of documents includes:

1) An original Credential (document of education) and its supplements with grades/marks.

The documents should be legalised by the Consulate of the Russian Federation or by [Apostille](#).

Legalisation must be carried out in the country, issuing the document of education.

The detailed information about the legalisation is published on the official web-site of the [National Information Center](#) for the recognition of the education in Russian Federation.

The documents issued in the member countries of the multilateral or bilateral agreements can be submitted without the legalisation ([The list of countries](#)).

2) Certified Russian translation of the legalised educational documents and supplements. The translations should be notarised in the Russian Federation or in the Russian embassy/consulate abroad.

The copies of translated documents should be attached to the notarised translations.

The documents issued in the member countries of the multilateral or bilateral agreements can be certified by the rules of the issuing country ([The list of countries](#)).
